Cheatsheets / **Defending Against AI-Generated Attacks**

Teach an AI to Phish

Generative AI for phishing attacks

Malicious actors can use generative AI for phishing
attacks.

Difficult to identify AI generative content

Identifying the difference between an AI-created
message and a human-created one is difficult.

Malicious Actors use Generative AI

Malicious actors might use Generative AI to reduce the
required effort to generate personalized, targeted
phishing emails.
